## WORK EXPERIENCE

---

**Java Full Stack Developer**  
Capgemini | Mumbai, Maharashtra

oct 2022 – Present

- 2 Years of hands-on-experience using Java, Microservice, SpringBoot, Angular and knowledge of AWS Concepts.
- Knowledge of Different Database Sources- MYSQL and PostgreSQL
- Good Communication Skills and can adjust quickly in a team environment.
- While Contributing to the project worked over weekends and different shifts to meet the business requirements before SLA.
- Followed Agile Methodology during the project and Rally to Track all the Issues and Bugs.
- Expertise in finding the issues and Bugs in the code.
- In absence of Team Lead acted as Shift Lead to guide the team of 6 people to complete the Daily Business Requirements.

## PROJECTS

---

### General Electric

In this project, I've manage a critical application overseeing the operation of large turbines that generate power. This system tracks turbine runtime, interruptions, and operational data to facilitate accurate billing for client companies utilizing turbines to supply electricity. As developer, our focus is on enhancing functionalities and resolving any existing defects within the application to ensure seamless and efficient turbine performance.

- I worked for about 2 Years in the this Project where I had an experience working with 2 Different Teams

- design and implementation of new functionalities in the application, ensuring that it aligns with the evolving requirements of monitoring and managing turbine operations efficiently.

- *Technologies Used: Java, SpringBoot, Angular, MySQL*

- Proactively identified and addressed software defects within the system, employing rigorous debugging and troubleshooting techniques to enhance overall application stability.

- Collaborated with cross-functional teams to optimise the application's performance, thereby improving the real-time tracking and reporting capabilities essential for accurate billing.

- Worked on refining the user interface for better user experience, incorporating user feedback and industry best practices to ensure a user-friendly and intuitive interface.

- Actively engaged in collaborative problem-solving sessions with stakeholders to understand their unique requirements and challenges, translating these insights into effective software solutions that meet both technical and business needs.

## CERTIFICATIONS

---

**AWS Certified Cloud Practitioner**

[View credentials](#)

**Agile Software Development**
